

JIGSAW
LIFE SAFETY

Jigsaw Life Safety Third Party Services are invaluable to a fire or code official looking for support with permitting reviews. Whether the project is a renovation, addition, or new construction, our team of registered fire protection engineers, designers, and NICET IV consultants are expert in ensuring the project will meet all applicable codes and standards pertinent to the fire protection, life safety, and means of egress design.

Jigsaw Lifesafety will review the medium-to-large sized projects that come across your desk, giving you more time for your inspections.

**JIGSAW LIFE SAFETY
THIRD-PARTY REVIEW**

COLLABORATIVE PROCESS

Jigsaw works closely with the jurisdiction to ensure the expectations of the code or fire official are clearly documented. We then endeavor to exceed those expectations with our reporting quality and turnaround time. Jigsaw Life Safety will examine and review plans for the fire protection and life safety systems proposed to be installed to determine compliance with applicable building codes. For each noted non-compliance, the Code Deficiency Report shall cite the relevant code section(s), the nature of the deficiency, and the location of the deficiency for transparency. When all issues are resolved, a signed and sealed Third Party Plan Review Approval Certification Letter will be issued to the fire or code official. With this report, the official will also receive a compilation of the Code Deficiency Reports that facilitated the final approval, with remediation strategies clearly documented for review.

Third-party plan review by Jigsaw Life Safety helps ensure project in your jurisdiction meet or exceed requirements for quality, safety, and code compliance.

- Our engineers and consultants have an extensive knowledge of all applicable codes and standards pertinent to Fire Protection and Life Safety Systems
- We have decades of experience in preparation and review of fire protection, fire alarm, and smoke control systems
- Our licensed fire protection engineers have Masters of Science degrees in Fire Protection Engineering
- Our team are all registered in the State of MA as Professional Engineers or have obtained NICET Level IV* certification

Our plan review and inspection services include:

- Fire protection
- Fire alarm
- Smoke control
- Means of egress
- Fire resistance rated construction
- Fire stopping special inspections
- Smoke control special inspections
- And much more...
